VLAT / PUBLIC MARKET DOCUMENTATION

Website Terms of Use

Public informational website use, third-party market access, intellectual property, permitted conduct and limits of reliance.

PUBLICATION STATUS: OPERATOR REVIEW REQUIRED BEFORE REPRESENTING THIS DOCUMENT AS FINAL OR LEGALLY COMPLETE.

01 / Coverage and Publication Status

These terms govern access to the public-facing informational pages, downloadable documentation and market-reference features at thebreakroom.xyz, to the extent offered by the website operator. Before publication as binding legal terms, the operator should verify its legal identity, governing jurisdiction, required consumer notices, contact channel and enforceability under applicable law.

This document is a draft of website-use conditions and is not represented as independently reviewed legal counsel, as a contractual purchase agreement for VLAT, or as the terms of an external decentralized exchange. Trading venues apply their own distinct terms.

02 / Informational Services and Third-Party Execution

The website is intended to present general public information, observable third-party market references, technical explanations and externally hosted trading links. It does not independently maintain a VLAT order book, act as a market maker, guarantee swap completion or take custody of visitors' assets through these pages.

External chart providers, blockchain explorers, decentralized protocols, wallet software and swap terminals operate independently. Users interact with those services under their individual agreements, privacy notices, fees, security practices and eligibility conditions. A link does not constitute endorsement or a guarantee of continued availability.

03 / Data Accuracy and Changes

Data displayed or linked on the website may include calculated cross-rates, delayed market metrics, unverified third-party classifications and market values reported under different methodologies. Such information is informational and not a binding transaction quote, valuation opinion, or professional recommendation.

Content, source availability, layout, documentation, public APIs and navigation may be changed, suspended or corrected. No undertaking is made to provide uninterrupted access or to publish any particular future feature.

04 / Permitted Use and Security

Visitors should not attempt unauthorized access, impersonate the website operator, interfere with interfaces, distribute malicious code, conduct abusive automated requests against market-data providers, or use the site in violation of applicable law.

Visitors are responsible for independent verification of addresses, wallet transaction approvals and external URL destinations. No site content authorizes circumvention of third-party security or regulatory controls.

05 / Intellectual Property and Trademarks

Website presentation, original copy, visual identity and other identified authored material may be protected by applicable copyright and trademark rules. The VLAT symbol, Solana names, Raydium marks, DEX Screener names, and third-party logos may be associated with separate rights holders.

Nothing on the website grants an implied license to republish proprietary website assets or to misrepresent affiliation with independent trading services.

06 / Warranty and Reliance Limitations

To the extent permitted by applicable law, information is provided on an as-available basis without a guarantee as to pricing accuracy, availability, merchantability or fitness for a particular investment or trading purpose. Liability limitations, if adopted, must be validated under applicable consumer law and cannot exclude non-waivable statutory remedies.

Users should not rely solely on website summaries to make financial decisions. Review the separate Market Risk Disclosures and consult qualified advisers where necessary.

07 / Operator Identification and Legal Review Required

The final published terms require verification of the actual website operator's legal name, operational contact details, legal jurisdiction, dispute-resolution provisions and effective date. These are deliberately not invented in this draft.

Version 1.0, draft prepared 26 October 2026. Review and approval by the responsible operator and qualified counsel, where appropriate, are required before representing these terms as legally complete.
